LOOKING FOR FORMER SHELTON STATE STUDENTS

This year Shelton State's Fifteenth Street Campus will celebrate its 40th anniversary. In 1953 the doors of the campus, then named Shelton State Vocational Trade School, opened and 313 students attended classes under the guidance of 16 instructors.

A special anniversary celebration will be held recognizing all former students and teachers on Sunday, November 14, from 2-4 p.m. in the Poole Learning Resource Center located on the Fifteenth Street Campus.

The college is looking for students who attended classes on the Fifteenth Street Campus during its 40 year history, especially those students enrolled during the 1950s and 1960s. The first graduate of the college, along with the first graduating class of 1956, will receive special recognition.

If you or anyone you know attended Shelton State's Fifteenth Street Campus, also known as the Vocational Trade School, Shelton State Technical College, and Shelton State Technical Division, in the past and would like to be part of the celebration, please write: Anniversary Celebration, Shelton State Community College, 1301 15th St. East., Tuscaloosa, AL 35404, or call Lucy Kubiszyn, 391-2221, or 391-2915.

SHELTON OPENS NEW COMPUTER LAB

Two years ago Shelton president Tom Umphrey announced the college was moving in a new direction, one that would place a greater emphasis on technical education. As part of this movement, the college made a commitment that all graduates of Shelton's technical programs would have at least a working knowledge of computers. Eventually, the college hopes to expand the computer literacy requirement to include all Shelton graduates.

The problem the administration faced in implementing the computer literacy goal was that Shelton's computers were, in many instances, old and outdated, and there were not enough of them. In order to better meet the needs of the college's students, one new computer lab has opened this fall and another will open before the end of the year. The total cost of both new labs is approximately \$100,000.00.

Twenty-five new Hewlett Packards Nectra computers have been purchased by the college to replace the outdated nine-year-old computers and to help modernize Shelton's computer lab facilities. The new computers will offer 250 megabytes as compared to the 20 megabytes offered by the old machines. This new classroom, which will be considered state-of-the-art, will be used for traditional college courses. Approximately 20 computer classes will be offered in the lab each week and will enable over 800 students to be trained on computers during a semester.

"These new computers will allow students to learn newer versions of programs, such as windows, on the machine," said Darrell Wright, computer science instructor. "These 486 computers will allow us to run high memory demand programs, word processing, spread sheets and data bases."

Another new computer science lab should be ready for use by November. This lab will house an additional 20 computers and will be located in the Morrison Industrial Training Center. As an open lab, this classroom will allow students to talk through a computer to a local area network. This lab will be available to business and industry and special classes scheduled at the college.

CORRECTION!!!

In last week's Monday Report, it stated that the Fredd Campus total enrollment for Fall Semester was 169 students. This statement was incorrect. There were 169 students enrolled in the eight programs participating in the extended registration period. Fredd's total enrollment for Fall semester is 263 students. The Monday Report is happy to correct the error.

PHI THETA KAPPA HONORS SCHOLARSHIP RECIPIENTS

The 1993-94 Shelton State Scholarship recipients will be honored by Phi Theta Kappa, national community honorary, at a reception. It will be held on Tuesday, October 5, from 5-7 p.m. in the Skyland Auditorium

SHELTON STATE COSMETOLOGY DEPARTMENT WILL SOON BE INTRODUCING A NEW IMAGING SYSTEM

Everyone at the Shelton State Cosmetology department is excited about the new hairstyle imaging system! This system allows a person to have an idea of what he or she may look like with a particular hairstyle, color, and even makeup! This is a wonderful way for anyone to experiment with a new style or color. When the new look has been achieved, the person can take a photograph and video tape to a hair stylist and show them how they want to look. The imaging system can produce 12-24 different images, custom design hair, color, and makeup. The Cosmetology Department will be introducing the system soon so look for more information in the coming weeks. It really is an experience!

NIGHT EXERCISE CLASSES FOR SPRING 1994 WILL BE TAUGHT

Body Sculpting/Non Impact Aerobics will be taught by Dr. Milady Murphy Mondays and Wednesdays, Tuesdays and Thursday nights. Cost for the semester will be \$60.00 for the community and \$30.00 for students. The class will begin at 5:30 p.m. in the Wellness Center. For more information call Dr. Milady Murphy at 391-2394.

HARPER RECEIVES AWARD

Marvin Harper has been chosen to receive an Alabama Preservation Alliance Merit Award for 1993. This award will be presented at the annual meeting of the Alabama Preservation Alliance which will be held in October in Talladega, Alabama.

Harper retired several years ago as executive director of the Tuscaloosa County Preservation Society. Since then he has assisted Katherine Alexander in developing the college's historical preservation program.

WELCOME MERCEDES BENZ!
